Nikita Khokhlov

Fullstack developer, 7+ years

Location: UAE, Dubai

Email: nikita.kh.front@gmail.com

Profile

I am currently engaged in fullstack development. At my current place of work, I often encounter technologies that I am not familiar with yet, but I am open to new knowledge.

I always try to improve my soft skills. I have worked in both large and small teams and I know how to maintain a healthy workflow and communication with designers and other developers, I introduce the best practices into everything I do.

Work experience

Eventagrate
March 2022 - currently
UAE, Dubai

Fullstack developer
Duties: Development of user interfaces. Optimization of web applications for various devices (computers, tablets, mobile devices). Designing data on the backend. Building and using the REST API. Writing unit tests.

Results: I have launched about seven commercial projects from scratch.

Sber
July 2020 - March 2022
Russia, Moscow

Frontend developer
Duties: Development of user interfaces. Work with the design system.

Results: Developed the bank's internal application (HR platform — Pulse). More than 200 thousand active users. Optimized the process of processing documents and planning the bank's budget, which significantly reduced costs.
